Adrian Searching Sans Library

J: Essentially, when would you use…when, if ever, would you use the library database for stuff?

A: Honestly, I never really have…[laughs]

J: Really!

A: I…I've thought that I…definitely wanted to or thought that I should…

J: mhhmm…

A: …but it's a little…for me, it's a little overwhelming and…

J: …some…

A: …intimidating, and…

J: …someone else said exactly the same thing…

A: …yeah…

J: …I mean, you're not alone, definitely.

A: …it's just, there's something very sterile about the environment and it's just isn't very conducive to me for actually…

J: …find things…

A: …yeah, finding things.

J: That's really interesting.

A: I mean, I did…when I first got to USF I did the whole tour of the library course…and in a couple of classes they've had the…showing how to do…

J: …how to get to stuff…

A: …yeah, but still, there's just something that keeps me away from there.

J: That's really interesting.
